(b) A "Permitted Peripheral Device" is any Revware MicroScribe digitizing device which (i) permits a user to collect position and orientation data and use that data to manipulate objects in a computer generated representation, and (ii) is supported by the Licensed Software.

(c) The "Licensed Software" is Revware's MicroScribe SOFTWARE DEVELOPMENT KIT and any related examples that may be provided independently which, in conjunction with compatible Permitted Peripheral Devices, may be used for collecting position and orientation data and manipulating objects in a computer generated representation, and which consists of binary code, certain header files and sample files which Revware may provide in source code format, and associated documentation.

(d) The "Embedded Code" is code that is incorporated into or modified within a product developed by Developer in whole or in part through the use of the Licensed Software by Developer, or as a result of the copying or duplication by Developer of code created by a third party in whole or in part through the use of the Licensed Software.

(e) A "Publisher" causes the End-User Product to be reproduced and distributed to end-users, whether directly or indirectly, via the Internet or otherwise. A Publisher may also be the Developer, or may have retained Developer to create the End-User Product.
